Are you a serious woman looking for a legitimate opportunity to earn additional income? There are a number of opportunities that are available for women these days. However, these opportunities don't all involve selling makeup, cosmetics and candles. There are a number of income opportunities online that you can take advantage of to truly create wealth, stability and security for you and your family.

Let me dispel a few myths about income opportunities online.

The first myth about income opportunities online is that you have to be some type of computer genius in order to make any money online. This is certainly not the case. There are women and men from all types of backgrounds, economic scenarios and technical skill levels that are taking advantage of a turnkey income system to create both part time and even serious full time income and wealth online.

One woman in California took advantage of a proven work at home business system and she was able to make over \$18,000 in one month! You don't have to be a search engine geek or some type of computer specialist to make money online. If you can turn a computer on, get on the internet and check email, you have all of the skills necessary to capitalize on income opportunities online.

The second myth about income opportunities online is that all income opportunities online are just pyramid schemes. While there are certainly many pyramid schemes online, not every opportunity is a scheme. There is a simple way to tell whether an opportunity is a legitimate opportunity. To figure it out, you simply need to look at the product or service.

Does the company offer a product or a service that people can benefit from even if they didn't decide to get involved in the business opportunity? If the product or service only has benefit for those who are involved in the business opportunity, then it is possibly not worth pursuing further. However, if the product or service has benefit as a stand alone product without necessary getting involved in the business opportunity, then it is a legitimate opportunity.

For example, in the income opportunities online that I'm involved with, there are many people who have submitted testimonies just based on the product that we offer. For example, one person shared a story about how she was able to save over \$6,000 just by using our product. This had nothing to do with our income opportunity. These savings came simply by using our product.

The third myth about taking advantage of income opportunities online is that you need to have a lot of time to take advantage of these opportunities. One of the great things about some of the better opportunities is that there is a system of leverage that is put in place so that you can have success even if you don't have a lot of time at your disposal.

For example, there are marketing systems in place that you can take advantage of where the marketing system does most of the work for you. The marketing system drives the prospects to your web site. The marketing system follows up with the prospects for you. With a cutting edge marketing system, your prospects can even get their questions answered by someone else as opposed to you.

So what is the best income opportunity online to take advantage of? You should take advantage of any business opportunity that offers a product that offers stand alone value, meaning you can benefit from it even if you didn't get involved in the business opportunity. The product should also be something that you can get passionate and excited about.

As for me personally, I believe the best products to offer are personal development training systems and marketing systems. Here's why. If you are offering a physical product, like makeup or cosmetics, you have a limited market. That market consists of women who wear makeup or cosmetics. However, if you offer a product like personal development training systems and marketing systems, you have a product that has universal appeal. Anyone looking to better themselves and anyone looking to make more money in their business becomes a potential prospect for your business.

So don't be misled by the many myths about income opportunities online. Check it out yourself and get involved in the opportunity that is right for you.
